**ROYAL  
MELBOURNE  
SHOW**

**BEEF CARCASE  
COMPETITION**

Conducted by

**RASV**

The Beef Carcase Competition provides breeders with the opportunity to benchmark their stock and celebrate excellence in beef carcase breeding, with more than 600 cattle shown over 11 days of Show.

The Royal Melbourne Show Beef Carcase Competition has a specific emphasis on delivering an exceptional exhibitor experience, with the highest calibre of judges, exhibitor facilities and results technology.

The Beef Carcase Competition continues to grow and is fast becoming the key event to attend in the annual agricultural calendar.

## JUDGES

### **Kate Spry – School & College Paraders' Competition**

The judge of the School & College Paraders' Section of the Beef Carcase Competition at the 2015 Royal Melbourne Show is Kate Spry. Kate and husband Matt own and operate Spry's Shorthorns in Tamworth (Northern NSW). Spry's Shorthorns are a MLA Target 100 Producer.

Over the last five years the Spry's have also introduced Angus and White Dorper cattle to their enterprise.

Kate was a finalist in both the State Paraders' Competition RAS 1994-1995 and the Junior Judging RAS Competition Sydney between 1993 and 1996. She has participated as a finalist at various Royal Show Paraders' Competitions and National Heifer Shows until the age of 23. Kate has also judged various Parader Competitions at local and regional level and Youth Shows.

Kate has exhibited at various Royal and National Shows and Sales with both cattle and sheep and grew up in the Shorthorn Youth program, being publicity officer in 1999 to 2000. From 2005 to 2007 Kate was a Vice President of the Beef Improvement Association and has been on various show and sale committees.

We welcome Kate to the Beef Carcase Competition at the 2015 Royal Melbourne Show.

### **Matt Spry – Led Steer & Heifer Beef Carcase Competition**

Matt owns and operates Spry's Shorthorns with wife Kate in Tamworth (Northern NSW).

Matt has judged at many Royal Shows, and National Show and Sales across Australia, including the 2013 New England Angus Breeders' Bull Show and Sale, Tamworth 2011 Dungong Steer Spectacular and Carcase Competition, 2007 Dubbo Show – All Breeds and Steers, ; 2006 Royal Melbourne Show – Angus Feature Show, 2005 Quirindi Prime Stock Show, 2003 Hereford National Show and Sale Wodonga, 2002 Royal Adelaide Show – Shorthorns, 2002 Sydney Royal Show – Various Breeds, 2000 Parkes Show – All Breeds, Brisbane Royal Show – Shorthorns, Bathurst Royal Show – All Breeds; 1995 Devonport Royal Show, Canberra Royal Show – Limousin Feature Show. Matt was the 1993 State and National Winner Australian Champion Junior Judge (under 25).

Currently Matt also buys cattle for Woolworths.

Matt is passionate about the meat and livestock industry and is fortunate to have been born and raised in a successful seedstock operation which has always focussed on building solid relationships with clients and active involvement with various sectors of the beef industry. He appreciates all facets of livestock assessment and general husbandry and has had substantial involvement with a wide variety of industry stakeholders from beef industry leaders to buyers, feedlotters, processors and producers. Matt has assisted clients to liaise and network within the industry by offering support with marketing their progeny to feedlotters, re-stockers and processors.

We welcome Matt to the Beef Carcase Competition at the 2015 Royal Melbourne Show.

# REGULATIONS OF BEEF CARCASE COMPETITION

300. The Regulations appearing in this Schedule form part of the General Regulations and conditions of entry to an Event at the Royal Melbourne Show. In the event of any inconsistency between the General Regulations and these Regulations, the General Regulations shall prevail to the extent of the inconsistency unless the General Regulations provide otherwise.

## COMPETITION ENTRY

301. Entries in the Beef Carcase Competition must be received at RASV's Administration Office, located at Melbourne Showgrounds, Epsom Rd, Ascot Vale, 3032 by no later than the specified Entry Close date in the Important Information for Exhibitors section. Entries must be accompanied by all fees at this time.
302. National Vendor Declaration must accompany livestock travelling to the Showgrounds for the purpose of this competition.
303. Steers and Heifers are eligible to compete in the Beef Carcase Competition.
304. Heifers are ineligible to compete for the Borthwick Trophy.
305. Each Exhibit must be tractable, and shall be led for Judging.

## ARRANGEMENTS FOR HOOF & HOOK

306. The live classes will be representative of the three Market Categories for the carcase appraisal, as follows:

Market Category		HSCW (kg)	Actual fat depth (mm)		
			P8	11/12 Rib	12/13 Rib
<b>B</b>	<b>Medium Domestic</b>	180 - 240	6 - 10	5 - 8	4 - 7
<b>C</b>	<b>Heavy Domestic</b>	241 - 300	8 - 13	6 - 10	5 - 9
<b>D</b>	<b>Export</b>	300+	12 - 17	8 - 13	7 - 12

307. To be eligible for participation in the Competition, Exhibits must participate in both the live (hoof) and carcase (hook) judging.
308. All Exhibits will be weighed live, upon arrival at the Showgrounds.
309. The live classes will be finalised once all Exhibits have been weighed, and determined on manageable numbers as deemed by the RASV (approximately 20 Exhibits).
310. All Exhibits must be paraded live before the Judge to be eligible for judging on the hook.
311. Only entries exhibited by a recognised School, College or TAFE (School) will be eligible for the Schools' competition and awards.
312. School or College Exhibits denoted by (B&P) at the time of entry will be eligible for the Bred and Prepared trophy.
313. All Exhibitors shall state with their entry:
- the breed, cross of breeds or mixture of breeds;
  - the birth date if known, otherwise the month born, of each animal entered so far as this is known;
  - the name and breed of the sire and registration ID if known; and
  - the name and breed of the dam and registration ID if known.
314. The RASV reserves the right to reject or limit entries at their absolute discretion, at any time, and for any reason. In this regard, Exhibitors are advised that accommodation for Beef Carcase Exhibits may be limited. If entries exceed the quantity that can be suitably accommodated, it may be necessary for the RASV to ballot entries.
315. For the purpose of this competition Hormone Growth Promotants are not permitted.
316. An animal or carcase which, in the opinion of the Chief Steward, shows secondary sex characteristics will be deemed to be a bull and will not be eligible for an award.
317. All Exhibits must be either polled or dehorned.
318. All Exhibits must comply with the Property Identification Code (PIC) and National Livestock Identification Scheme legislation of Victoria. Exhibits not appropriately identified by means of an electronic identification will be deemed ineligible.
319. The RASV reserves the right to insist that ineligible animals be removed from the Showgrounds at the expense of the Exhibitor upon request of the Chief Steward.
320. In order for Exhibits to be slaughtered, and therefore eligible for competition, Exhibitors must provide a National Vendor Declaration.

321. Subject only to the General Regulations, the Chief Steward reserves the right to make such determinations and directions on any matter in relation to the conduct of the Beef Carcase Competition, as he/she thinks fit.
322. The Chief Steward reserves the right to penalise, disqualify or make ineligible for an award any Exhibit in the Beef Carcase Competition that is determined to be outside of acceptable specifications in regard to weight, eye muscle area, meat colour, fat depth, fat colour, fat distribution and marbling.
323. **All Exhibits shall be rung through the nose and at all times shall be led by such nose ring. This includes the unloading of livestock upon arrival at the Showgrounds.**
324. All Exhibits for the Beef Carcase Competition are required to be housed as directed at the Showgrounds. Any proposed departure from this requirement by an Exhibitor must receive prior written permission from the RASV.
325. A complete Timetable of Arrangements for the Beef Carcase Section will be available prior to the Show. The timetable that appears in this Schedule is subject to change and will be finalised once an indication of entry numbers for this competition is obtained.

## JUDGING OF BEEF CARCASES

326. Carcases will be judged within the general parameters of the Australian Beef Carcase Appraisal System (ABCAS), incorporating carcase attributes relevant to Market Specifications and Meat Standards Australia (MSA) developed eating quality standards.
327. Carcases will be judged according to the following Schedule of maximum points:

1. Market Specification	20 points	3. MSA Eating Quality*	45 points, combined
P8 Fat Depth	10	Ultimate meat pH	Units
Meat Colour	5	Ossification Score	100 - 590
Fat Distribution	5	Tropical Breed Content	0 - 100%
Penalties	As required	Hump Height	mm
2. Saleable Meat Yield	35 points	AUS-MEAT Marbling	0 - 6
		MSA Marbling	100 - 1190
Rib Fat Depth	15	Sex	Male/Female
Eye Muscle Area	20	<b>Total</b>	<b>100 points</b>

328. To receive eating quality points all carcases must meet MSA minimum standards, as follows:
- Minimum 3mm of rib fat
  - Adequate fat distribution
  - Ultimate pH below 5.7
  - Meat colour of 1b and no greater than 3
329. Carcases will not be penalised for bruising should any occur.

## ACQUISITION OF CARCASES

330. The RASV reserves the right to arrange the sale of carcases over the hooks using a grid system. Carcases that are sold by this method attract a commission of \$30.00 (incl GST) which is payable to the RASV.
331. The RASV will receive payment directly from the processor. Once received, the RASV will forward all funds as directed by the Exhibitor. The RASV will deduct commission payable to the RASV, and any state duty, transportation costs, charges and levies payable to third parties.
332. Payments for all carcases will be made into the bank account nominated for prize money and carcase payments by the Exhibitor upon entry.

## PAYMENT OF PRIZE MONEY

333. Prize money as stated in the relevant Schedule and Catalogue includes GST, when applicable. By indicating that you are GST registered you are agreeing to receive a Recipient Created Tax Invoice (RCTI) for any prize money won, and for prize money to include GST. No money is allocated unless otherwise stated.
334. Prize money will be paid after the Royal Melbourne Show into the bank account nominated for prize money and carcase payments by the Exhibitor upon entry.
335. The RASV reserves the right to increase, alter or delete special prizes or prize money.

# AWARDS FOR BEEF CARCASE COMPETITION

## AWARDS – LED CLASSES

- a) Ribbons will be awarded for each of the ordinary classes for 1<sup>st</sup> to 6<sup>th</sup> place winners.
336. The highest placed School & College Exhibits from each ordinary class will then compete for the following awards:
- Champion School & College Steer or Heifer
  - Reserve Champion Schools & College Steer or Heifer
337. The highest placed Schools or Colleges Exhibits will be drawn only from the top five Exhibits in each live class, ie: 1<sup>st</sup> through to 5<sup>th</sup> place. If a class does not have a School or College exhibit amongst these top five, then no Exhibit from that class will compete for Champion or Reserve Champion Schools Steer or Heifer awards.

## SCHOOL & COLLEGE PARADERS COMPETITION

338. Students from each School or College entering steers or heifers in the Royal Melbourne Show Beef Carcase Competition may enter the School & College Paraders Competition.
339. When entering the Beef Carcase Competition, those Exhibitors that are eligible (ie: Schools and Colleges) are able to enter the School & College Paraders Competition.
340. Paraders must be an enrolled student of a School or College, and, if not participating as part of a School or College program, must have written permission from their School or College to exhibit of their behalf.
341. Paraders must enter the Paraders Competition under the name of the School or College under which they have entered the Beef Carcase Competition.
342. Exhibits paraded must be entered in the Beef Carcase Competition under the School or College under which it is entered in the Paraders Competition.
343. Entries stating the name, age and School/College must be received at the RASV's Administration Office, located at Melbourne Showgrounds, Epsom Rd, Ascot Vale, 3032 by the specified Entry Close date.
344. The number of students from each School or College is restricted to three for each steer or heifer exhibited (as opposed to entered). Points gained in this section contribute to the Most Successful School or College Exhibitor awards.
345. Each Parader will be assessed for showmanship, animal/handler relationship preparation of animal, cleanliness of gear and suitability of animal.
346. A white coat or breed uniform recognised by The Royal Agricultural Society of Victoria Limited must be worn by the Parader when parading his/her animal
347. All animals paraded must comply with the Regulations for Beef Carcase, especially with regard to the use of nose rings.
348. Awards will be presented to the Paraders who best prepare an animal for the show ring, attention being given to the manner in which it is brought before the judges.
349. Classes will be arranged in suitable groups based on age.
350. Sashes will be awarded for each heat for 1<sup>st</sup> to 6<sup>th</sup> place winners.
351. A Certificate of Participation will be awarded to all entrants. The RASV may choose to provide these Certificates after the completion of the Show.

## MOST SUCCESSFUL SCHOOL OR COLLEGE HOOF & HOOK EXHIBITOR.

352. The Bott-Burston perpetual trophy plus an annual replica will be awarded to the School or College gaining the highest total number of points in the School & College Paraders, Live Steer and Heifer, and Beef Carcase classes based on the following:
- 3 points for - 1st
  - 2 points for - 2nd
  - 1 points for - 3rd
  - 2 points for - Grand Champion
  - 3 points for - Champion
  - 2 points for - Reserve Champion

## THE BORTHWICK TROPHY

353. The conditions of the competition are as under:
- The competition to be between teams of three purebred steers. Heifers are not eligible for the Borthwick Trophy.
  - Steers to be led in the judging ring.
  - Each team to be representative of any recognised Beef Cattle Breed.
  - Each team to be selected from amongst the entries in the ordinary classes by a Breed Panel prior to live judging of these classes.
  - Each breed to be represented by one team only.
  - The results of both live and carcase judging will be considered in determining the winner of the Borthwick Trophy, with 25% of total points allocated for live judging and 75% of total points allocated for carcase appraisal. (Maximum points awarded by live judge - 100 points).
  - Points gained by the steers in the carcase judging (maximum 300 points) to be added to the points awarded alive.
  - The winner of the Borthwick Trophy will be the team that gains the highest aggregate points in both the live and carcase judging. (Maximum 400 points).
  - The Borthwick Trophy to be competed for in perpetuity, and the name of the winning breed to be engraved on it each year. The Trophy to remain the property of The Royal Agricultural Society of Victoria Limited. A replica of the trophy will be presented to each of the Exhibitors of the winning team.

## THE ROYAL MELBOURNE SHOW STEER BONANZA

354. The Royal Melbourne Show Steer Bonanza is an optional 'opt-in' cash prize pool.
355. All steer and heifer exhibits eligible for the Beef Carcase Competition are eligible to enter.
356. Exhibitors must nominate on their entry form which exhibits they would like to enter in the Bonanza. Each entry is \$50 (incl GST). This fee is in addition to the standard entry fee. Full payment must be made upon entry.
357. Each exhibit may only be entered in the Bonanza once. An exhibitor may choose to enter as many or as few of their exhibits as they wish.
358. An Exhibitor has the option to substitute their Bonanza entry with another of their exhibits already entered in the ordinary classes of the Beef Carcase Competition. The substituted exhibit must be entered under the same Exhibitor Name.
359. Substitutions must be made to the Superintendent's Office no later than 1 hour after the completion of weighing. Regular announcements will be made throughout the Pavilion, and it is the responsibility of the Exhibitor to ensure this deadline is met.
360. Entries in the Bonanza are not transferable between Exhibitors.
361. At the conclusion of carcase judging, the carcase results of all exhibits entered in the Bonanza will be ranked. The carcasses will not be grouped into classes prior to ranking.
362. The Bonanza carcase with the highest score will receive a cash prize of 50% of the total prize pool. The Bonanza carcase with the second highest score will receive a cash prize of 30% of the total prize pool. The Bonanza carcase with the third highest score will receive a cash prize of 20% of the total prize pool.
363. The total cash prize pool is inclusive of GST. If any of the winning exhibitors are not registered for GST, GST will not be paid.
364. If an animal is withdrawn from the Beef Carcase Competition after the close of entries, the Exhibitor may transfer the Bonanza entry to any of their exhibits that have not been entered in the Bonanza. If the Exhibitor has no exhibits that are not entered in the Bonanza, the Bonanza entry of the withdrawn exhibit will be forfeited, and is non-refundable.

## CONDITIONAL PRIZES

RASV is pleased to advertise the following conditional prize money on behalf of each breed society. These prizes will be paid directly by each society to the eligible exhibitor/s.

Any breed society wishing to advertise their conditional prize money is invited to contact the RASV on (03) 9281 7444.

Exhibitors wishing to enquire about the listed prizes are advised to contact their relevant breed society directly.

### ANGUS

**VICTORIAN STATE COMMITTEE – ANGUS AUSTRALIA** will provide trophies to the exhibitors and breeders of the winning team of the Borthwick Trophy provided it is won by the Angus Breed.

### BEEF SHORTHORN

**PRIZE: JOHN WILLIAMSON MEMORIAL TROPHY SUPPORTED BY THE BEEF SHORTHORN SOCIETY OF AUSTRALIA (VICTORIAN BRANCH).**

Awarded to the Exhibitor of the Beef Shorthorn gaining the highest points for a carcass across all classes combined.

**PRIZE: \$200 SUPPORTED BY THE BEEF SHORTHORN SOCIETY OF AUSTRALIA (FEDERAL COUNCIL)**

Awarded to the Exhibitor of any winning animal in the live judging provided it is a Beef Shorthorn or Beef Shorthorn cross and is the progeny of a by a registered Beef Shorthorn sire or dam.

**PRIZE: \$200 SUPPORTED BY THE BEEF SHORTHORN SOCIETY OF AUSTRALIA (FEDERAL COUNCIL)**

Awarded to the highest scoring Beef Shorthorn or Australian Shorthorn or cross-bred steer or heifer carcass, where either the sire or dam is a registered Beef or Australian Shorthorn and provided that a minimum score of 75 points or more is achieved (highest scoring over all classes)

**PRIZE: \$500 SUPPORTED BY THE BEEF SHORTHORN SOCIETY OF AUSTRALIA (FEDERAL COUNCIL)**

Awarded to the Exhibitor of the Champion Steer on Hoof and Hook combined. Prize money to a maximum of \$500 only.

### BELGIAN BLUE

THE FOLLOWING PRIZES ARE SUPPORTED BY THE **AUSTRALIAN BELGIAN BLUE CATTLE SOCIETY.**

**PRIZE: 1<sup>st</sup> \$100, 2<sup>nd</sup> \$50, 3<sup>rd</sup> \$25 – Hoof judging (per class) provided the exhibit is sired by a registered Pure Bred Belgian Blue Sire.**

**PRIZE: \$75 Grand Champion Steer or Heifer on the Hook provided the exhibit is sired by a registered Pure Bred Belgian Blue Sire..**

**PRIZE: \$35 Reserve Grand Champion Steer or Heifer on the Hook provided the exhibit is sired by a registered Pure Bred Belgian Blue Sire.**

**PRIZE: 1<sup>st</sup> \$300, 2<sup>nd</sup> \$200, 3<sup>rd</sup> \$100 Hook judging (per class) provided the exhibit is sired by a registered Pure Bred Belgian Blue Sire.**

**PRIZE: \$200 Awarded to the exhibitor of the Grand Champion Carcass provided the exhibit is sired by a registered Pure Bred Belgian Blue Sire.**

**PRIZE: \$100 Awarded to the exhibitor of the Reserve Grand Champion Carcass provided the exhibit is sired by a registered Pure Bred Belgian Blue Sire.**

### BELTED GALLOWAY

THE FOLLOWING PRIZES ARE SUPPORTED BY THE **AUSTRALIAN BELTED GALLOWAY ASSOCIATION INC.**

**PRIZE: \$50 Awarded to the Exhibitor of the highest scoring pure or cross bred Belted Galloway carcass, provided the cross bred is entered as a Belted Galloway.**

**PRIZE: \$150 Awarded to each Exhibitor of pure or cross bred Belted Galloway carcasses provided the carcass gains 85 points or higher.**

**PRIZE: \$500 Awarded to the Exhibitor of the Grand Champion Carcass provided it is a Belted Galloway or Belted Galloway cross.**

**PRIZE: \$500 Awarded to the Exhibitor of the Grand Champion steer provided it is a Belted Galloway or Belted Galloway cross.**

### CHAROLAIS

THE FOLLOWING PRIZE IS SUPPORTED BY THE **CHAROLAIS SOCIETY OF AUSTRALIA**

**PRIZE: \$400 Awarded to the Exhibitor of the Grand Champion Carcass, provided such Exhibit is sired by a Charolais.**

### DEXTER

PRIZE: \$200 SUPPORTED BY **DEXTER CATTLE AUSTRALIA INC.**

Awarded to the Exhibitor of any winning animal in the live or carcass judging providing it is a Dexter or Dexter cross sired by a registered Dexter or from a Dexter mating

#### **GALLOWAY**

THE FOLLOWING PRIZE IS SUPPORTED BY **THE AUSTRALIAN GALLOWAY ASSOCIATION**

PRIZE: \$550 Awarded to the Champion Carcass provided it has a parent which is registered with the AGA.

#### **HIGHLAND**

PRIZE: \$600 SUPPORTED BY THE **AUSTRALIAN HIGHLAND CATTLE SOCIETY INC.**

Awarded to the Exhibitor of the Highland gaining both first place and 80 points or higher in any Carcass class, provided the sire or dam is a Highland and nominated on the entry form.

Winning first place entitles the exhibitor to apply to the AHCS by 31 October in the current calendar year for inclusion in the AHCS Carcass Competition.

#### **LIMOUSIN**

**LIMOUSIN**  
*Carcass, Yield, Efficiency.*

THE FOLLOWING PRIZES ARE SUPPORTED BY **THE AUSTRALIAN LIMOUSIN BREEDERS SOCIETY LTD.**

PRIZE: \$250 Awarded to the Exhibitor of the Grand Champion Carcass provided it is sired by a Limousin.

PRIZE: \$150 Awarded to each Exhibitor of the Exhibits which win the Borthwick Trophy provided they are Limousins.

#### **MURRAY GREY**

THE FOLLOWING PRIZES ARE SUPPORTED BY THE **MURRAY GREY BEEF CATTLE SOCIETY.**

To be eligible to receive the prize money that the MGBCS is offering all winning steers/heifers must be by a registered Murray Grey Sire, as indicated on their entry form.

PRIZE: \$250 Awarded to the School exhibiting the Highest scoring Murray grey on hoof and hook combined.

PRIZE: \$250 Awarded to the Highest Scoring Murray Grey School Carcass.

PRIZE: \$250 Awarded to the Highest scoring Murray Grey Carcass

PRIZE: \$250 Awarded to the Champion Light Domestic Steer

PRIZE: \$250 Awarded to the Champion Heavy Domestic Steer

PRIZE: \$250 Awarded to the Champion Export Steer

PRIZE: \$250 Awarded to the Champion Light Domestic Carcass

PRIZE: \$250 Awarded to the Champion Heavy Domestic Carcass

PRIZE: \$250 Awarded to the Champion Export Carcass

PRIZE: \$1000 Awarded to the Grand Champion Carcass

PRIZE: \$1000 Awarded to the Grand Champion Steer

#### **RED ANGUS**

[www.redangus.org.au](http://www.redangus.org.au)

THE FOLLOWING PRIZES ARE SUPPORTED BY THE **RED ANGUS SOCIETY OF AUSTRALIA INC.**

PRIZE: \$500 Awarded to the Exhibitor of a Red Angus or Red Angus sired crossbred animal that wins Grand Champion led steer, provided there are over 50 entries and has a RASA registered pedigree.

PRIZE: 1st \$150, 2nd \$75, 3rd \$25 Awarded to the Exhibitor of a Red Angus or Red Angus cross steer, placing 1st, 2nd or 3rd on the hook.

PRIZE: \$1000 Awarded to the Exhibitor of a Red Angus or Red Angus crossbred animal winning Grand Champion Carcass, provided there is over 50 entries and has a RASA registered pedigree.

PRIZE: \$100 per exhibit Awarded to the Exhibitor(s) of Red Angus exhibits winning the Borthwick Trophy.

## RED POLL

THE FOLLOWING PRIZES ARE SUPPORTED BY THE AUSTRALIAN RED POLL CATTLE BREEDERS INC. (VICTORIAN REGION)

PRIZE: \$250 Awarded to the Exhibitor of the Grand Champion Carcase, provided such exhibit is a pure-bred Red Poll by a registered sire.

PRIZE: \$200 Awarded to the Exhibitor of the Highest Scoring pure bred Red Poll Steer.

PRIZE: \$200 Awarded to the Exhibitor of the Highest Scoring Cross Bred Steer provided it is at least 50% Red Poll.

## SANTA GERTRUDIS

THE FOLLOWING PRIZES ARE SUPPORTED BY THE SANTA GERTRUDIS BREEDERS (AUST) ASSOCIATION.

PRIZE: \$500 if there are greater than 50 head entered and \$250 if there are under 50 head entered, providing the winning entry is of predominantly Santa Gertrudis blood and showing Santa Gertrudis characteristics.

## SHORTHORN

THE FOLLOWING PRIZES ARE SUPPORTED BY SHORTHORN BEEF (VICTORIAN BRANCH)

PRIZE: \$250 Awarded to the exhibitor of the Grand Champion provided such Exhibit is a pure bred Shorthorn. Name of the sire and dam to be stated on the Entry Form.

PRIZE: \$100 Awarded to the exhibitor of a Shorthorn steer placing 1st in the live class provided such an exhibit is by a registered sire or dam.

PRIZE: \$100 Awarded to the exhibitor of a Shorthorn steer placing 1st on the hook provided such an exhibit is by a registered sire or dam.

PRIZE: \$250 Awarded to the exhibitor of the highest point scoring Shorthorn steer above a minimum of 80 points.

PRIZE: The **JOHN CRILLY MEMORIAL TROPHY** will be awarded to the breeder of the highest scoring purebred Shorthorn Carcase.

## SIMMENTAL

THE FOLLOWING PRIZES ARE SUPPORTED BY SIMMENTAL AUSTRALIA VICTORIAN BRANCH

PRIZE: \$500 Awarded to the exhibitor of the Heavy Domestic Champion Carcase provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (Minimum 25% or more Simmental) OR SimAngus.

PRIZE: \$200 Awarded to the highest scoring Heavy Domestic Simmental Carcase if not the winner, provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (Minimum 25% or more Simmental) OR SimAngus.

PRIZE: \$500 Awarded to the exhibitor of the Export Champion Carcase, provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (Minimum 25% or more Simmental) OR SimAngus.

PRIZE: \$200 Awarded to the highest scoring Export Champion Simmental Carcase if not the winner, provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (Minimum 25% or more Simmental) OR SimAngus.

PRIZE: \$1500 Awarded to the exhibitor of the Grand Champion Carcase, provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (minimum 25% or more Simmental) OR SimAngus.

PRIZE: \$1200 Awarded to the winner of the Borthwick Trophy, provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (Minimum 25% or more Simmental) OR SimAngus.

PRIZE: \$500 Awarded to the exhibitor of the Grand Champion on the Hoof, provided the winning Carcase is nominated on the entry form as Simmental, Simmental Cross, Simbeef (Minimum 25% or more Simmental) OR SimAngus.

## SQUATE MEATERS

THE FOLLOWING PRIZES ARE SUPPORTED BY THE SQUARE MEATERS CATTLE ASSOCIATION OF AUSTRALIA LTD.

PRIZE: \$200 Awarded to the Exhibitor of the Grand Champion Live or Carcase animal provided it is a Square Meaters, sired by a Square Meater.

PRIZE: \$100 Awarded to the Exhibitor of the highest scoring Square Meaters Steer or Heifer on the "hook" (must score over 80 points to be eligible for the prize), providing the animal is nominated as a Square Meaters or Square Meaters Cross, exhibit to be the progeny of a registered Square Meaters sire or dam.

# AUSTRALIAN BEEF CARCASE APPRAISAL SYSTEM (ABCAS)

The Australian Beef Carcase Appraisal System ranks beef carcasses on their overall merit, and gives feedback to producers about compliance to market specifications, the yield of saleable meat and the potential eating quality of the meat.

ABCAS combines the extensive experience of the NSW Department of Primary Industries in carcase judging and evaluation with the advanced technology of the world's most comprehensive grading system, Meat Standards Australia (MSA). Practices to improve and optimise meat quality have come directly from research by the Co-operative Research Centre (CRC) for Beef Quality.

ABCAS focuses on the factors that producers can control. In commercial grading, MSA accounts for many factors that affect eating quality but which the producer cannot control, such as pre-slaughter management, livestock handling, hanging method, chilling and ageing.

As far as possible, carcase competitions and educational activities should be structured in accordance with MSA grading requirements to optimise meat quality and demonstrate best practice. Please note that although ABCAS provides grading information on all carcasses, in many competitions they will not be eligible for sale as MSA-graded beef, either because they do not meet MSA licensing conditions, or because they cannot meet requirements for pre-slaughter management (e.g. no mixing of different mobs of cattle, and direct delivery from farm to abattoir).

To assess market suitability, the basic specifications of a carcase are judged for compliance against the specifications of the appropriate market category.

## 1. - Compliance to Market Specifications (20 points total)

Most markets require carcasses to meet basic specifications of age (dentition), sex, weight and P8 (rump) fat depth. Dentition is usually checked in the live cattle, and is not part of the carcase assessment, while some markets specify only steers.

**1.1 - P8 Fat Depth (10 points)** is measured on the hot carcase at the P8 site, over the rump, and is the method of describing fatness in the AUS-MEAT national carcase description language. It is commonly used to set market targets and for payment of premiums and discounts. Optimum P8 fat depth is the range set for each class (Market Category) in the carcase specifications.

**1.2 - Meat Colour (5 points)** is recorded using AUS-MEAT standard meat colour chips in a range of 1a (very pale) to 7 (very dark purple). Colour strongly influences consumer appeal, with bright, pinkish colours in the range 1b to 3 being most acceptable to consumers. Carcasses must meet the MSA specification of Meat colour 1b to 3 to receive eating quality points.

**1.3 - Fat Distribution (5 points)** Ideally, a carcase will have a thin, even fat cover over all the important cuts, especially over the rump and forward along the backline. This contributes to eating quality by slowing the chilling rate, and reduces weight loss due to dehydration as the carcase chills.

Carcasses will lose points for inadequate cover, or for heavy, wastey deposits. Key areas for assessment of excessive fat deposits are the subcutaneous fat (especially over the ribs), intermuscular (seam) fat and internal fat in the cod, udder, ribs and brisket.

**1.4 - Fat Colour** is recorded for your information at the end of the eating quality section but has no direct impact on eating quality; excessive yellowing or softness may affect the saleability of the carcase. Fat colour is assessed on the internal seam fat at the quartered site using the AUS-MEAT chips and ranges from 0 (bright white) to 9 (very yellow).

There are no points allocated for fat colour but individual competitions may apply penalty points (max. 5) if a carcase exceeds Fat colour 3 or if a market specification for fat colour is set.

## 1.5 - Penalties may be applied to carcasses that:

- fall outside the specified weight range (usually 1 point per kg outside)
- Exceed Fat colour 3 or fall outside the specified fat colour range
- Show Secondary Sexual Characteristics (bull or stag)
- Fall outside specifications for dentition
- Exhibit obvious defects, e.g. bruising, blood splash, injection site damage.
- \* Carcasses must have adequate fat cover over the highlighted areas to receive maximum points.

Points	Description
5	Meets minimum fat requirements with good even fat cover over entire body, without excess deposits of subcutaneous or seam fat.
4	Meets minimum fat requirements with good even cover over the butt.
3	Meets minimum fat requirements with fat cover over major primals, Cube roll, Striploin and Rump.
2	Lean carcasses or carcasses with uneven fat distribution. Also carcasses with some excess fat deposits or seam fat.
1	Fails to meet minimum fat requirements or over-fat carcasses with excessive fat deposits.
0	Extremely lean or extremely fat, wastey carcasses.

## 2. - Saleable Meat Yield (35 points total)

Saleable meat yield is the proportion of the carcass that is saleable as primal cuts and meat trimmings. It excludes bone and waste fat. High-yielding carcasses are preferred, and they are heavily muscled with a thin, even fat cover, but the fat depth and distribution must be adequate to meet quality requirements.

**2.1 - Rib Fat Depth (15 points)** is a good indicator of carcass yield with over-fat animals having lower yields. It is measured in millimetres at the quartering site (usually 10/11th or 12/13th rib). Optimum rib fat depth is the range set for each class (Market Category) in the specifications. To receive eating quality points, carcasses must meet the MSA minimum standard of 3mm at the quartering site.

**2.2 - Eye Muscle Area (20 points)** is a good indicator of the red meat content of the carcass. It is measured in square centimetres at the quartering site (10/11th or 12/13th rib) and points awarded according to the area measured in relation to the carcass weight. The larger the rib eye area in relation to the carcass weight the higher the points awarded.

## 3. - MSA Eating Quality (45 points, combined)

When Meat Standards Australia (MSA) grades a carcass, grading is based on the principles that:

1. The potential meat quality of an animal must be realised as far as possible by minimising stress between farm and slaughter, and by optimising chilling/electrical stimulation conditions during processing
2. There are known variable factors that affect the eating quality of individual muscles and adjustments are made for their effect.

The MSA Grading Model predicts eating quality of 40 muscles by 6 different cooking methods. It applies all our current knowledge about the factors affecting meat quality - which muscles they affect, by how much, and what interactions there are with other factors. These have been defined by a large research effort and more than 439 000 consumer product tests, involving some 62 800 consumers. In the Australian Beef Carcass Appraisal System the MSA eating quality score is the average predicted MSA eating quality score of 11 major primal cuts, cooked by their optimum method. Scores have been scaled to deliver a maximum of 45 points for eating quality. If carcasses fail to meet MSA minimum requirements, they are below the benchmark standard for high quality table beef and will not receive an eating quality score.

**3.1 - Ultimate pH** is a measure of acidity / alkalinity levels of the meat. It is very important for keeping quality (shelf life) and is related to its cooking properties, colour and consumer acceptance.

After slaughter, the reserves of glycogen (energy) in the animals' muscles are converted to lactic acid, causing the pH to fall. As long as there is adequate glycogen present at slaughter, the pH will fall to within the normal range of 5.4 to 5.7. If there is not enough glycogen (due to stress or poor nutrition) then pH will remain above the acceptable limit of pH 5.70 and the meat is likely to be dark in colour, with poor keeping quality.

High pH meat is more difficult to cook to the right degree of doneness. At the same temperature as a cooked normal steak, it appears much rarer and if further cooked will lose its juices and become tough and dry.

- MSA rejects carcasses with pH over 5.70
- A slight downward adjustment is made to eating quality of all cuts from carcasses high in the acceptable 5.70 range.

To maintain high glycogen levels it is important to maintain a high level of nutrition and water prior to slaughter and minimise transport and handling stress.

## Eating quality variables and their effect

*In commercial grading, once cattle have been slaughtered and have met processor requirements for eligibility, the grader enters information about each carcass and the MSA Model predicts the eating quality of each cut (visit [www.msagrading.com](http://www.msagrading.com) for further details). Predictions are scientifically based and validated by the extensive MSA consumer testing program.*

*Processor requirements include:*

1. Meeting the MSA pH decline "window" - the rate of chilling and amount of electrical stimulation to optimise meat quality, determined by CRC research)
2. Cattle must be from a licensed producer / saleyard and must be accompanied by an MSA vendor declaration.
3. Direct consignment cattle must be killed the day after dispatch.
4. No mixing or drafting of different mobs of cattle.

*Please note that the structure of some competitions may preclude the carcasses from commercial grading. In this case, the assessments are provided for education and feedback.*

## **3.2 - Ossification (maturity) and Carcass Weight**

Ossification score is a measure of physiological maturity of the beef carcass. Hot Standard Carcass Weight (HSCW) is used in conjunction with the ossification score to identify carcasses with greater weight for maturity - faster grown cattle have better eating quality.

As beef cattle mature the cartilage present around the bones of the spinal column gradually change into bone (ossify). The rate at which this occurs is reasonably predictable but is affected by factors such as sex and nutrition. The scale of ossification runs from 100 to 590.

Cuts from carcasses with lower ossification at the same weight are graded higher. Increasing ossification has a cut-by-cut effect with a high effect on some cuts (e.g. rump) and a low effect on others (e.g. oyster blade).

Ossification score is influenced by a number of other factors:

- Heifers tend to have higher ossification scores at the same age compared to steers
- Hormonal Growth Promotants (HGP) - treatment tends to increase ossification scores
- Nutritional setbacks or injury can increase ossification score, and this is not reversible.

Ossification score is assessed at three different locations on the sawn chine: the 5 sacral vertebrae (Tail), 6 Lumbar (back) and first 13 thoracic vertebrae (ribs).

## **3.3 - Tropical Breed Content (TBC) % and Hump Height**

MSA data clearly shows that cattle with tropical breed content have a higher risk of delivering "unacceptable" beef to consumers. Research by the Beef CRC has found that these breeds do carry more genes associated with toughness, but if animals are well managed before slaughter and optimally processed, the differences are small. MSA research has determined that the major negative effect is toughening of the striploin, cube roll, tenderloin and oyster blade - all high value grilling cuts. The effect is smaller in the cuts with higher connective tissue such as brisket, topside, outside (silverside) and eye round.

The percentage of tropical breed content is taken into account by the grading model in combination with other factors. All cuts from 100% tropical breeds can still meet acceptable MSA consumer standards if the cattle are within age and fat limits and optimum eating quality interventions such as tenderstretch hanging, and ageing of cuts, are applied.

In crossbred cattle the hump height is an easily measured indicator of the percentage tropical breed content (TBC %). Animals of the same TBC can show different levels of visible traits such as hump, pizzle and ear length. Analysis of MSA data has confirmed that when adjusted for carcass weight, hump height can also be used to estimate the 'tropical breed effect' on eating quality. Hump height is measured in increments of 5mm on the hump muscle (*M. Rhomboideus*) on the animals' neck.

The tropical breed content (TBC) is supplied by the producer on the MSA Vendor Declaration or as the breed description on the competition entry form. Values are expressed as a percentage: 0, 12, 18, 25, 38, 50, 75, 100.

The grading model adjusts hump height for carcass weight and ossification, then checks this against the declared TBC% and applies whichever is the greater of the two eating quality adjustments.

### 3.4 - MSA and AUS-MEAT Marbling Score

Marbling is the intramuscular fat (IMF), which appears as fine flecks within the muscle. It is deposited unevenly throughout the body, increasing through the carcass towards the neck and decreasing towards the tail. As cattle fatten, deposits accumulate in all the main fat depots (under the skin, around the internal organs, between the muscles and inside the muscles) but some cattle have the genetic ability to favour the development of marbling within the muscles. To maximise marbling, cattle must be on good nutrition, at least during the finishing stage, and well finished.

MSA research associates increased marbling to higher eating quality scores for many grilling and roasting cuts. The effect is greatest in the loin cuts (cube roll and striploin) but it is possible to achieve good eating quality without visible marbling.

The MSA grader assesses marbling on the exposed rib eye (eye-muscle) at the quartering site.

AUS-MEAT marbling is assessed on a scale of 0 to 6, reported in tenths within each score, and is based on the total amount of marbling within the eye muscle.

An MSA-specific marbling score is also given on a scale of 100 to 1190, in increments of 10, with emphasis on its fineness and how it is distributed. This is thought to relate more closely to eating quality.

### 3.5 - Sex

There are small differences in eating quality between steers and heifers, other factors being equal. Although small, the effect of sex is rather complex, with heifers having a lower eating quality in some muscles and higher in others compared to steers.

The biological basis for the sex effect is not clear at this stage.

### 3.6 - Rib Fat

In ABCAS, Rib fat depth is primarily used as an indicator of saleable meat yield, but it also plays two roles in eating quality. Firstly, MSA requires a minimum of 3mm of subcutaneous fat at the quartering site with even fat distribution required over the entire body. This fat cover helps avoid eating quality problems caused by a rapid or irregular pattern of chilling (see fat distribution). Secondly, fatter carcasses have slightly improved eating quality, over and above that associated with marbling and in this case a small upward adjustment is made to the grilling cuts.

### 3.7 - Other variable factors affecting eating quality

There are other factors affecting eating quality in the MSA model, but most are usually constant across competition groups, or are outside the producer's control. The factors include:

#### 3.7.1 - Hang Method

Tenderstretch hanging (from the pelvis) has a number of significant advantages over the traditional hanging from the Achilles tendon (AT or hock), including:

- Significant improvement in eating quality from most of the major high-priced cuts
- A reduced need for post-slaughter ageing to improve eating quality
- Significant improvement in eating quality of tropical breed types
- Counteracts the negative eating quality effects of hormonal growth promotants (HGP)

#### 3.7.2 - Hormonal Growth Promotants (HGPs)

HGPs have a negative effect on eating quality, especially in the grilling cuts, and this effect will soon become part of the eating quality calculation in the MSA model.

#### 3.7.3 - Milk Fed Vealer (MFV)

Unweaned calves produce beef with better eating quality compared to weaned calves of similar age and fatness. The MSA model adjusts scores for all cuts.

#### 3.7.4 - Saleyards

The extra stress of saleyard handling compared to direct transport from farm to abattoir has been shown to reduce eating quality. The MSA model adjusts scores across the carcass.

#### 3.7.5 - Ageing

Storing beef carcasses or vacuum-packed cuts for up to 21 days at 0-1°C improves tenderness. Improvement is greatest in AT hung carcasses, in those with higher tropical breed content and those treated with HGPs.

# MSA INDEX INFORMATION

The carcass feedback provides a great deal of carcass information, including the new MSA Index.

## **What is the MSA index?**

The MSA index is a single number and standard national measure of the predicted eating quality and potential merit of a carcass.

The MSA index is a number between 30 and 80, expressed to 2 decimal places (ie. 54.62), to represent the eating quality potential of a whole carcass. The MSA index is independent of any processing inputs and is calculated using only attributes influenced by pre-slaughter production. It is a consistent benchmark which can be used across all processors, geographic regions and over time. It reflects the impact on eating quality of management, environmental and genetic differences between cattle at the point of slaughter.

## **How is the MSA index calculated?**

The MSA model predicts the eating quality of 39 cuts in a carcass using the measurements collected by accredited MSA graders.

MSA eating quality scores are the combination of tenderness, juiciness, flavour and overall liking of beef. The MSA index is a weighted average of these scores for the 29 MSA cuts for the most common corresponding cooking method. It is not a yield measurement.

The MSA index is a tool to be used by producers and lot feeders. Inputs in the MSA model controlled by the processor, for example hang method, days aged, ultimate pH (within the acceptable range up to 5.71) and loin temperature are set as default values. The MSA index is calculated for Achilles hung carcasses with 5 days ageing.

A carcass with a higher MSA index will have higher beef eating quality scores for many cuts compared to a lower MSA index carcass. The changes in eating quality of individual muscles will depend upon the different combinations of carcass inputs affecting cuts in different ways. This is why the MSA index is a measure of the average eating quality of the whole carcass.

## **Why is the MSA index useful?**

Producers are able to access MSA feedback for individual carcass weight, rib fat, MSA marbling score, ossification score, HGP status, hump height and sex. However it is difficult to assess the importance of these individual traits on eating quality and how changes in breeding and genetics or management decisions impact on the eating quality of the carcass. The MSA index combines the impact of all these inputs and allows producers to evaluate changes in their business, to drive a faster rate of gain in eating quality.

With the goal to improve eating quality for the consumer, the producer and lot feeders are faced with how to economically improve eating quality and the MSA index through genetics and management interventions.

## **Why do the highest MSA Index numbers not win the competition?**

The MSA Index is a predictor of eating quality, but does not include market specifications or saleable meat yield considerations that are important components of a carcass competition.

# HOW TO IMPROVE YOUR SCORE

The feedback from your score sheet provides a great deal of information and can identify areas for future improvement. When preparing cattle for a competition, remember that high scores come from three main factors:

Meeting the weight, fat, sex and dentition specifications of the class  
High yield of saleable meat - optimum fat cover and heavy muscling  
High eating quality - young and well nourished, not stressed, with marbling as a bonus

An "average" young animal will achieve a high score if it is fed well in the final six weeks, it is not excessively stressed in the 24 hours before slaughter and it meets the correct weight and fat specifications. Very high scores are possible by retaining these features and increasing saleable meat yield.

## 1. - Meeting market specifications

Key indicators: HSCW; sex; dentition; P8 fat depth; Meat colour; Fat colour.

Meeting the weight/fat target is the key starting point for achieving a high score. Achieving a weight and fat target is a complex combination of management and animal factors - frame size, muscling, genetics - and nutrition. Heavily muscled or large framed cattle require higher level of nutrition (and/or a longer time) to put on the same fat depth.

Optimal meat colour comes from cattle that are younger, have high levels of nutrition and low pre-slaughter stress (see meat quality). Ideal fat colour (firm and white) results from feeding a grain-based ration. Young, grass-fed cattle produce a creamy-white fat colour, which is highly acceptable for most markets. Deeper yellow fat is undesirable and comes with older, grass-fed cattle. Some feeds can change the characteristics of fat, for example, large amounts of lupins can produce fat that is soft and greasy.

## 2. - Improving saleable meat yield

Key indicators: Eye-muscle area (EMA), rib fat depth.

"Yield" is the weight of saleable cuts as a percentage of carcass weight. It is not to be confused with dressing percentage which is the ratio of carcass to live weight. High-yielding carcasses are heavily muscled with optimum fat depth.

Among cattle meeting market specifications and minimum quality requirements for grading, the greatest potential to improve your score is by increasing yield. CRC research confirms that high yielding carcasses contain significantly more beef.

Ensure fat depth is within the optimum specifications - this will maximize your yield points with the particular animal. Overfat carcasses require more trimming, resulting in lower yield.

To increase EMA points, and therefore yield, after fat depth is optimized, in future you will need to select a more muscular animal.

Consider these points:

Crossbreed, using high-yielding sire breeds

Select bulls for moderate frame and heavy muscling, either visually or with help from BREEDPLAN EBVs for higher yield and EMA

Heavily muscled cattle occur in most breeds, you don't have to use large European types

More muscular cattle usually put on less fat, especially if they are large framed - they may need more feed or longer preparation time to reach the target fat depth

Females from heavily muscled bulls are just as functional for breeding, as long as you avoid the extremes.

## 3. - Improving eating quality

Key indicators: pH, Ossification score, Tropical Breed Content, Hump height, Marbling, Meat colour

The above key indicators along with other factors such as hanging method and ageing combine to produce the final eating quality score. As some factors interact with others, it is not possible to allocate points independently to each factor.

A score of zero in this section means the carcass failed to meet one or more of the minimum requirements for grading. This does not mean the beef has no value, but does mean its value has been severely downgraded against the industry's minimum quality benchmark.

If you received zero in the eating quality section, use the individual feedback assessments to identify the reason. It may be pH over 5.7, meat colour over Chip 3, rib fat depth less than 3mm or inadequate fat distribution. Any of these factors will result in a complete loss of meat quality points, and should be given highest priority for correction in the future.

High pH or dark Meat colour are signs of pre-slaughter stress and low energy reserves at slaughter. Ensure as a minimum that nutrition is kept at a high level in the two weeks prior to slaughter, the animal has a quiet temperament and there is minimum handling and minimum time between farm and slaughter

Inadequate rib fat or fat distribution - feed a better quality ration with sufficient energy or feed for longer prior to slaughter

Once the carcass has met minimum grading requirements the best ways to maximize your eating quality score are:

Ensure optimum pH (5.4-5.6) and meat colour (1b to 1c) by building up energy reserves before slaughter (good nutrition, minimum stress, avoid mixing with strange cattle, minimise handling, minimum time from farm to slaughter)

Minimise the tropical breed content (hump height)

Do not use hormonal growth promotants (HGP)

Increase marbling by using proven genetics (BREEDPLAN EBVs and GeneStar Marbling)

Ensure good growth, without setbacks, and a fat cover near the top of the optimum range

Aim for lower ossification score by faster growth for age

Apart from these animal factors, research by the Beef CRC and MSA has defined other significant factors that can be used to improve meat quality. These are either included in MSA grading requirements or the variable factors in the meat quality calculation. They include:

Minimising pre-slaughter stress by conducting necessary pre-slaughter assessments well beforehand (say 2 weeks), and transporting cattle direct to the abattoir for slaughter without delay

Ensuring chilling and electrical stimulation are operated by the abattoir to optimum specifications

Hanging carcasses by tenderstretch to improve the eating quality of most major cuts and reduce the need for ageing

Ageing cuts after slaughter to increase tenderness.

Further Information

Meat Standards Australia - [www.msagrading.com](http://www.msagrading.com)

Beef CRC - [www.beefcrc.com](http://www.beefcrc.com)

NSW Department of Primary Industries - [www.dpi.nsw.gov.au](http://www.dpi.nsw.gov.au)

It is important to remember that to receive Eating Quality points, carcasses must meet MSA minimum standards:

Minimum 3mm of Rib Fat

Adequate Fat Distribution

Ultimate pH below 5.7

Meat Colour of or between 1b and no greater than 3

# EXHIBITOR LIST

For more than 160 years,  
the Royal Agricultural Society of Victoria  
(RASV) has been inspiring excellence  
in Victorian agriculture and food production.

In this pursuit for excellence the RASV  
conducts a range of world-class agricultural  
and leisure events throughout the year.
